

TRANSFORMING HOME SECURITY AND TRAFFIC LIGHT SYSTEMS WITH COMPUTER VISION AND HUMAN DETECTION

Prophet Israel Agyeman-Prempeh
Applied Project

Supervisor: Dr. Ayorkor-Korsah

Overview

INTRODUCTION

TRANSFORMING HOME SECURITY AND TRAFFIC LIGHT SYSTEMS WITH
COMPUTER VISION AND HUMAN DETECTION

Introduction

Smarter • Human Centered • Robust

Introduction

PROJECT AIM

This project observed some important issues in Ghana, namely home security and road transport efficiency and I made an attempt at solving them through two computer vision based applications. I developed an affordable and smart home surveillance system and an intelligent traffic light system to increase transport efficiency and safety in crossing roads with this technology

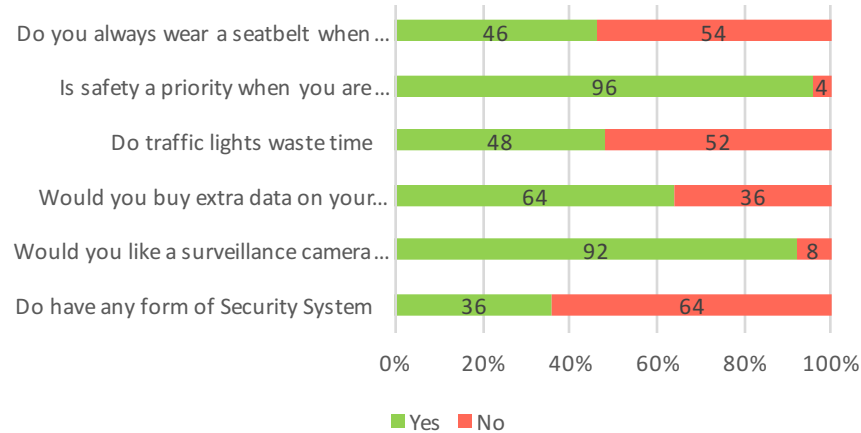

REQUIREMENTS

TRANSFORMING HOME SECURITY AND TRAFFIC LIGHT SYSTEMS WITH
COMPUTER VISION AND HUMAN DETECTION

DATA ANALYSIS

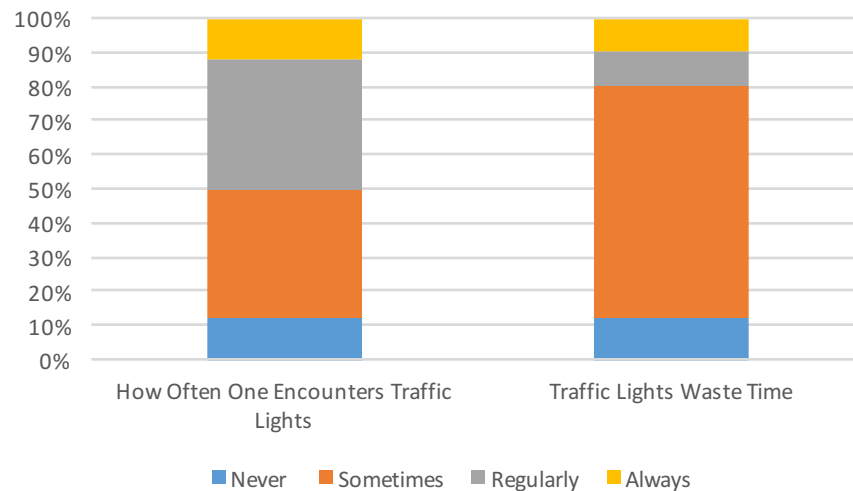

Responses of Participants to “Yes” or “No” Questions (%)

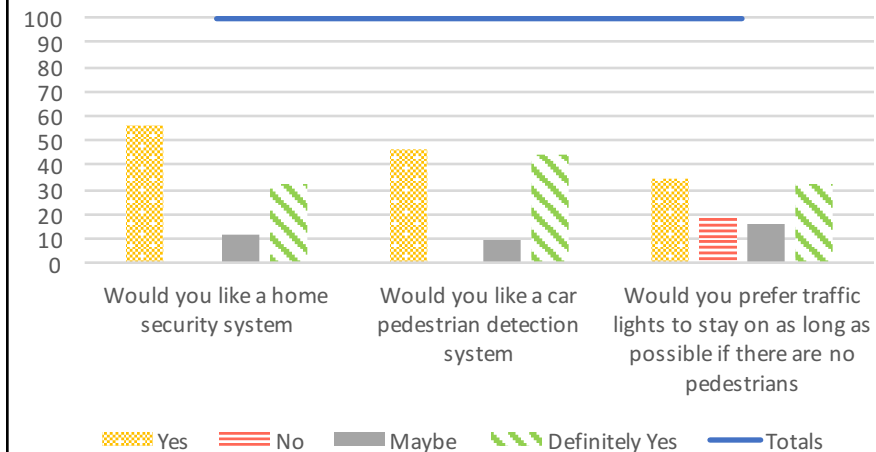

Various Ways Homes Are Secured

Experiences with Traffic Light Systems

A Graph Showing Interest of Respondents to Proposed Solutions (%)

Data Analysis -Summary

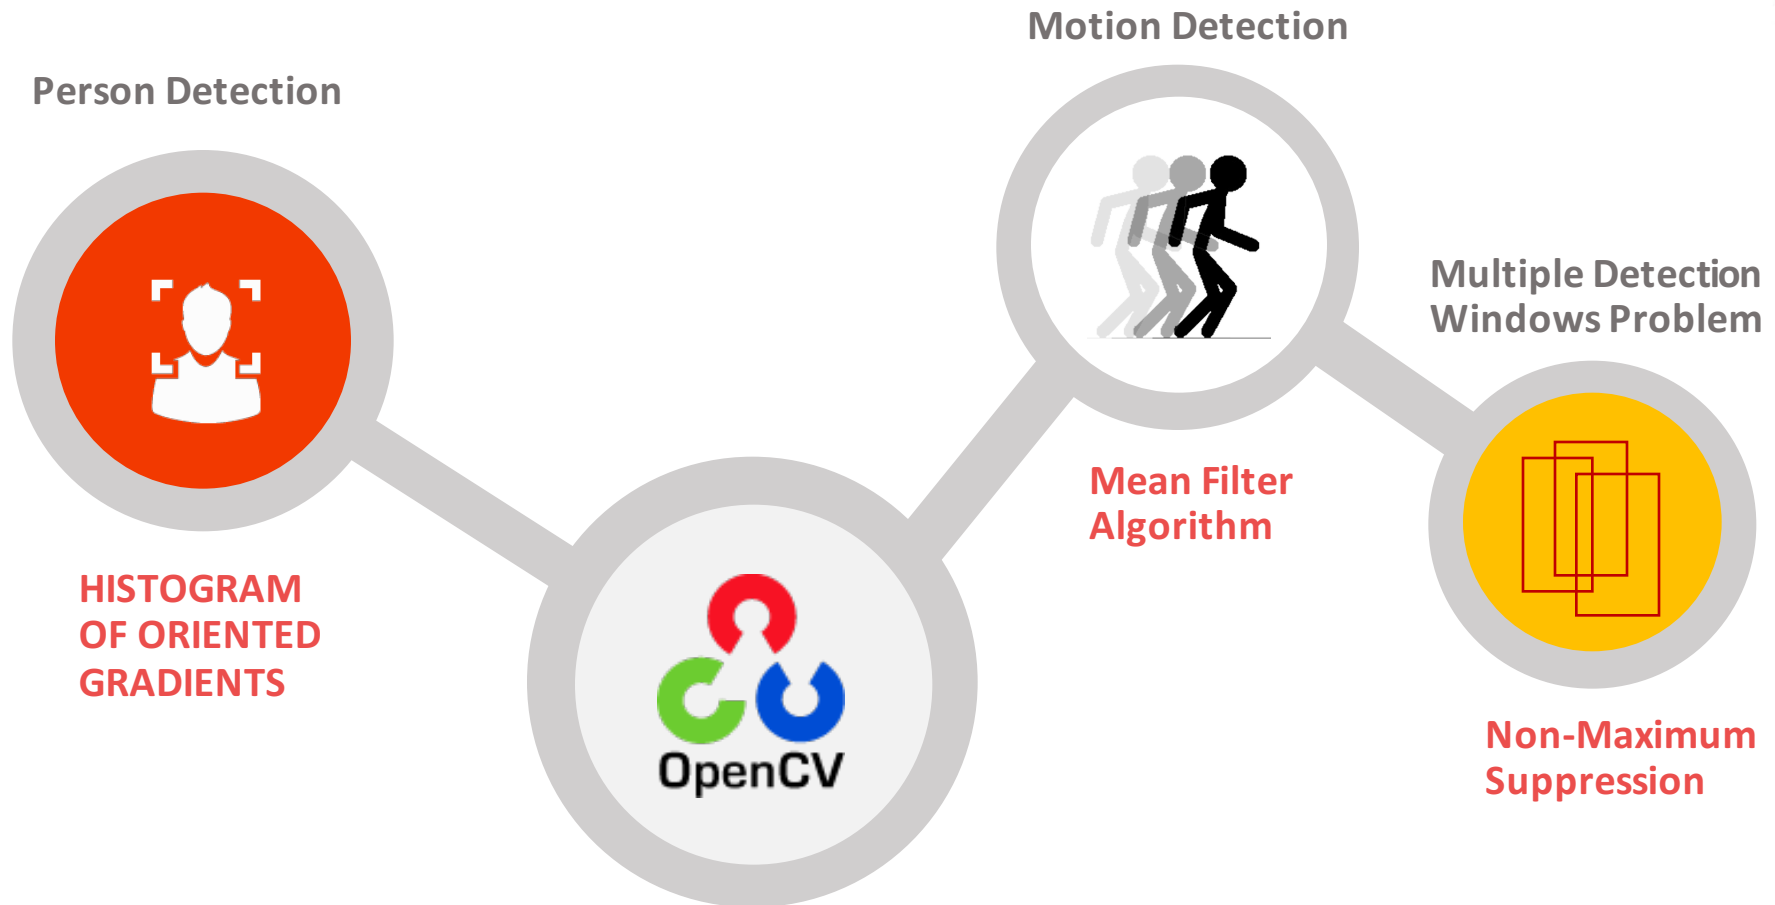

ALGORITHMS

TRANSFORMING HOME SECURITY AND TRAFFIC LIGHT SYSTEMS WITH
COMPUTER VISION AND HUMAN DETECTION

Existing Algorithms

Background Subtraction (Mean Filter)

Frame Difference

$$B(x, y) = \frac{1}{N} \sum_{i=1}^N V(x, y, t - i) \text{ , where } B = \text{Averaged background}$$

$$|V(x, y, t+1) - B(x, y)| > Th$$

ARCHITECTURE & DESIGN
